Supplier Tiering Intake Template (Engineering-led)

Document owner: _____ Date: _____ Business owner:
_____ Procurement ref: _____ Supplier name: _____
Service/product: _____ Contract start/renewal date: _____ In-scope
countries/regions: _____

1) What are we buying?

One-paragraph description of the service and how it will be used:

2) Integration summary (tick all that apply)

☐ No integration (standalone) ☐ SSO only ☐ API integration (read) ☐ API integration (write) ☐
Agent installed on endpoints/servers ☐ Network connectivity (VPN/private link) ☐ Inbound
connectivity to us ☐ Supplier remote support access into our environment

Notes (systems, scope, environments):

3) Access & privilege (tick all that apply)

☐ No access to our environment ☐ User-level access only ☐ Administrative/tenant admin access ☐
☐ Privileged support access (remote sessions) ☐ Ability to change security controls/configs ☐ CI/CD

or deployment capability affecting production ☐ Processes/hosts keys, certificates, secrets, or auth tokens

If any privileged access is requested, describe the access path + controls (PAM, MFA, JIT, approvals):

4) Data classification (tick all that apply)

☐ No data ☐ Public ☐ Internal business data ☐ PII (client/staff) ☐ Financial account/transaction data ☐ Authentication data (passwords, tokens, MFA seeds) ☐ Special category data (if applicable)

Estimated volume/scale (low/med/high) and retention:

5) Criticality & resilience

Does an outage materially impact a critical business service? ☐ Yes ☐ No

If Yes: impacted service(s) and acceptable outage window:

RTO/RPO expectations (if known): RTO: _____ RPO: _____ Workaround available? ☐ Yes ☐ No

6) Fourth parties / sub-processors

Known sub-processors involved in service delivery:

Can supplier provide a sub-processor list and notify changes? ☐ Yes ☐ No ☐ Unknown

7) Decision-tree outcomes (reference: supplier-tiering-decision-tree.md)

Step 1 (business critical): ☐ Triggers Tier 1 ☐ No Step 2 (privileged/prod influence): ☐ Triggers Tier 1 ☐ No Step 3 (data sensitivity): ☐ Tier 1 ☐ Tier 2 ☐ Continue Step 4 (integration pattern): ☐ Tier 1 ☐ Tier 2 ☐ Continue Step 5 (fourth party/concentration): ☐ Triggers Tier 1 ☐ No

8) Tier assignment (select one)

☐ Tier 1 (Critical) ☐ Tier 2 (Important) ☐ Tier 3 (Low)

Tier rationale (2–3 bullets):

-

-

-

9) Required next steps (based on Tier)

Evidence pack to issue: ☐ Tier 1 Evidence Pack ☐ Tier 2 Evidence Pack ☐ Tier 3 Lightweight Checks

Baseline controls to apply: ☐ SSO/MFA requirements ☐ Least privilege roles ☐ Logging/audit events required ☐ Connectivity pattern/segmentation requirements ☐ Vulnerability/patch commitments ☐ Incident notification requirements

10) Exceptions (if supplier cannot meet baseline)

Exception required? ☐ Yes ☐ No Gap(s):

Compensating controls (technical preferred):

Exception owner: _____ Expiry date: _____

11) Approvals

Security reviewer: _____ Date: _____ Business owner approval:
_____ Date: _____ Procurement/Legal (if required): _____ Date:
